IDENTIFIERS	*Bureau of Indian Affairs; Contract Schools; Elementary Secondary Education Act; Johnson O Malley Act

ABSTRACT

Presenting statistical data on the 1975 Bureau of Indian Affairs (BIA) operated schools, this publication is comprised of the following tabular data: (1) school census by BIA area and agency; (2) number of BIA schools operated, by type (day and boarding schools); (3) enrollment and average daily attendance by BIA area; (4) BIA boarding school enrollment and average daily attendance; (5) BIA day school enrollment and average daily attendance; (6) BIA dormitory enrollment and average daily attendance; (7) BIA school enrollment by grade and area; (8) BIA school completions and graduates by area; (9) BIA school enrollment by degree of Indian blood; (10) BIA school enrollment by tribe; (11) BIA school construction summary by area; (12) activities under the Elementary and Secondary Education Act, Public Law 89-10 (ESEA); (13) BIA higher education programs; (14) Johnson-O'Malley enrollments; (15) enrollments in schools contracted for operation by American Indian groups; and (16) BIA adult education programs and state funded programs for American Indian adults. A statistical fact sheet summarizing 1975 BIA school data is also presented, indicating a 1975 enrollment of 49,806 students aged 5 to 18 with an average daily attendance of 36,689.5, high school graduates numbering 1,511, 8th grade completions numbering 2,584, and post-graduate completions or placements numbering 287. (JC)

Documents acquired by ERIC include many informal unpublished materials not available from other sources. ERIC makes every effort to obtain the best copy available. Nevertheless, items of marginal reproducibility are often encountered and this affects the quality of the microfiche and hardcopy reproductions ERIC makes available via the ERIC Document Reproduction Service (EDRS). EDRS is not responsible for the quality of the original document. Reproductions supplied by EDRS are the best that can be made from the original.

Administrative Areas of the Bureau of Indian Affairs

JUNEAU AREA

acquired some facility in the use of the English language. This is a factor in the seemingly low numbers of graduates of Federal high schools. In fiscal year 1975, 1,511 high school students graduated, a decrease of 55 students from 1974.

Table 8 indicates the number of high school graduates, number of 8th grade completions, and number of Post High completions or placements.

Table 9 indicates students according to their degree of Indian blood. Full bloods comprise 76.5 percent of the total and only 0.6 percent are less than one-half Indian blood.

Table 10 shows tribal designation of students in Federal schools. One hundred and forty-one specific tribes or tribal groups and Aleuts, Eskimos, and the various tribes of Indians in Alaska were represented in 1975.

Ninety-five tribes had fewer than 39 members each and these are grouped together as "All Other Tribes." Aleuts, Eskimos, Navajos, Sioux, Chippewas, and Pueblos (including Hopi, shown separately) are the most numerous and together comprise 77.5 percent of the total enrollment.

Table 11 indicates the completed school construction, both new and replacement, during fiscal year 1975.

In fiscal year 1975, the Bureau of Indian Affairs participated for the eighth year in the Elementary and Secondary Education Act. Table 12 indicates the extent of the activities carried out under Titles I, II, III, and VII of the program. Also Title III of the National Defense Education Act.

Table 13 indicates the number of undergraduate and graduate students who received scholarship grants in fiscal year 1975, also the number of students earning degrees.

Table 14 shows the number of students enrolled in schools by States, receiving assistance through contracts funded under the Johnson-O'Malley Act which became law in 1934.

Table 15 shows the number of Indian pupils enrolled in schools being operated under contract to Indian groups.

Table 16 indicates the activities being conducted and the number of participants in the Adult Education program.

EDUCATION OF INDIAN CHILDREN IN 1975

Indian children attend public, Federal, Private and mission schools. In fiscal year 1975 there were 190,226 Indian students, age 5 to 18 years, inclusive, enrolled in these schools in the United States.

Education of Indian children residing in the States of California, Idaho, Michigan, Minnesota, Nebraska, Oregon, Texas, Washington and Wisconsin is the responsibility of the state concerned.

In 1975 more than half (63.7 percent) of all Indian children of school age (5 - 18) attended public schools. Of those enrolled in school, 69.9 percent attended public schools, 24.6 percent attended Federal schools, and 5.5 percent attended mission and other schools.

For more than three centuries Indian education in the United States was largely under the direction of missionaries. As early as 1568 the Jesuit Fathers organized a school at Havana, Cuba, for Indian children from Florida. This was the first school attended by Indian children from Florida. This was the first school attended by Indian children who lived within the United States.

Many of the treaties between the United States and Indian tribes provided for the establishment of schools for Indian children. Congress has also provided schools for Indian children where other educational facilities were not available. In 1842, there were 37 Indian schools in operation and by 1881 the number had increased to 106. In 1975 the Bureau of Indian Affairs operated 193 schools with an enrollment of 46,880 Indian children, and 19 dormitories for 2,926 children attending public schools.

The primary objective of Federal schools operated for Indian children living on Indian-owned or restricted trust lands is to prepare them for successful living. In Federal schools children develop basic academic skills, acquire an understanding of the social and economic world which surrounds them, learn improved standards of living, follow practices which assure optimum health, acquire the necessary

vocational training to qualify for gainful employment, and obtain sufficient education to enter special schools, and institutions of higher learning. The system of schools provided by the Federal Government for Indian children meets program standards required by the States in which they operate.

A full 4-year high school course was offered at 25 schools. 7 other schools offered high school training at less than the 4 year course.

Indian children are entitled to the same opportunities for public school education as are provided for other citizens living within a State. It is encouraging to note that the States have assumed responsibility for the education of 132,876 (63.7 percent) school-age Indian children in the States where the Bureau of Indian Affairs has direct educational responsibility. Over one-third are educated at no cost to the Bureau of Indian Affairs. In some States, however, tax-exempt, Indian-owned lands and large numbers of Indian children within a school district may create financial burdens for which local funds are inadequate. As early as 1890, contracts providing for financial assistance to schools attended by Indian children were negotiated with individual districts. It was recognized then, as today, that Indian children become better adjusted to living with all people in a community when they associate with other children in public schools. The Johnson-O'Malley Act, which became law in 1934, authorized the Secretary of the Interior to enter into contracts with States for the education of Indians and to permit the use of Federal school buildings and equipment by local school authorities. Consequently, some States with large Indian populations now have no Federal schools within their boundaries.

Under the terms of Public Law 874, 81st Cong. (64 Stat. 1100), as amended August 13, 1958, administered by the Department of Health, Education, and Welfare, a new Federal aid resource was made available to eligible school districts educating Indian children. This aid is available to meet partial costs of normal school operation. Additional supplemental aid for the education of Indian children under the Johnson-O'Malley program is limited to districts that do not qualify under the Public Law 874 program and to districts meeting educational problems under extraordinary circumstances, including

special services and special programs designed to facilitate the education of Indian children.

In fiscal year 1975, the Bureau of Indian Affairs entered into contracts with 9 States, 71 school districts in other States, and with 34 tribal groups in accordance with approved plans which specify conditions under which financial aid is extended. In addition to these, aid was provided through contracts for the education in public schools of 1,488 out-of-district Indian children living in dormitories operated by the Bureau of Indian Affairs in 7 towns adjacent to the Navajo Reservation, and in Albuquerque, New Mexico.

In summary, then, the Bureau of Indian Affairs had direct responsibility for the 49,806 children enrolled in Federal schools and housed in Federal dormitories, and partial financial responsibility for approximately two-thirds of those enrolled in public schools.

Statistics Concerning Indian Education are published annually by the Bureau of Indian Affairs and are available upon request.

Congressional appropriations to the Bureau of Indian Affairs are limited to the education of children of one-fourth or more degree of Indian blood and native children in Alaska, except for the Cherokee Agency where children of less than one-quarter degree of Indian blood enrolled in the tribe may attend Federal schools. Native children in Alaska are Indian, Eskimo, and Aleut. The 16 tables below relate to Indians and native children, as defined above, and to their schools.

Table 1 shows the enumeration of all Indian children from 5 to 18 years, inclusive, and those over 18 who are enrolled in school by area, agency, and school status.

For Indian children who are enrolled in public schools and are no longer a Federal education responsibility, the Bureau must rely on the public school systems to provide census information. Indian mobility accounts for the children, 5 to 18 years inclusive, who are shown under the caption "Information Not Available."

Five-year-olds have been included with the school-age population since fiscal year 1969 when kindergarten classes were added in some schools operated by the Bureau of Indian Affairs.

It should be noted that children over 18 are not included in the enumeration of school-age population. Table 1 is based on the annual school census of Indian children 5 to 18 years old, while Tables 3 through 10 are derived from annual attendance reports of individual schools operated by the Bureau of Indian Affairs and cover all students enrolled regardless of their ages.

Table 2 indicates numbers of schools by area. Table 3 indicates enrollment and average daily attendance in Federal schools by type of school and area. Average daily attendance for all schools was 75.4 percent in 1975 as compared to 80.1 percent in 1974.

In fiscal year 1975, the Bureau of Indian Affairs operated kindergarten classes in 101 schools (35 boarding schools and 66 day schools) with an enrollment of 2,485 children. All kindergarten pupils attend school on a day basis. The kindergarten enrollment represented 5.3 percent of the total enrollment.

Tables 4, 5, and 6 list individual schools and dormitories operated by the Bureau of Indian Affairs, mailing address, enrollment, average daily attendance, and grades taught.

The Albuquerque Dormitory is operated in conjunction with the Albuquerque Indian School but is shown with peripheral dormitories because these dormitory students attend public schools under conditions identical to other peripheral dormitories.

Table 7 indicates grade level. In 1975 enrollment in kindergarten and first four grades decreased 3,472 pupils to 17,187 as compared to the previous year's 20,659. This group represented 44.1 percent of the entire student body. An enrollment of 2,445 ungraded elementary students account for 5.2 percent of the total enrollment.

In line with the Bureau's policy of encouraging public school enrollment of Indian children, many students transfer to public schools when they reach the sixth grade and have

TITLE II

ASSISTANCE TO LIBRARY AND MEDIA

In fiscal year 1975 there were 41 projects for 91 schools with an enrollment of 12,725 children that received services from Title II. Sixty-six percent of the total funds available was spent on printed materials and thirty-four percent was spent on non-printed materials. Sixty-one schools were in the kindergarten to 8 group; seven were kindergarten to 12 and twenty-three were schools in the 7-12 group.
